

From Grant.

HEADQUARTERS OF THE ARMY OF THE POTOMAC. November 11.—On Wednesday evening, at 7 o'clock, s force of the coemy was discovered massing in front of our line near Fort Stedman. The guns of the fort opened fire, driving them to their works. The rebel batteries replied briskly, but they were soon silenced by our shells and morturs. A force of about one hundred and fifty rebels made a sortie from their lines and attempted to penetrate ours; but being met by a salute from our pieces they were not long finding their way back. As the enemy seem determined to pursue the policy of shooting at every man they see, our men are forced to retaliate. Accordinglyahe pickets in front of the Second Corps were briskly engaged the most of last night, and reports of musketry at times were almost continuous.

From the Shenandoah.

New York, November 12-The Herald's Washington special dispatch says that information has been received that the rebels in the Shenandoah Valley have been reinforced, and are attempting to flank the position of Sheridan, in order to at least threaten Penasylvania and Maryland with invasion. Sheridan, however, was prepared for them, and hearing of this on Wedne day last, had given marching orders to the army, which is in the fluest and most effective condition. Our despatches from the front represent that the rebels were some days ago in force at Staunton, and that it was their intention to move on our lines at once. Forty of Mosby's guerrillas, disguised in Federal uniform, yesterday morning, attacked a small train near Charleston, belonging to Sheridan's hrmy. The train was captured.

New York, November 12.-The Commercial's despatch says that Sheridan has handsomely checkmated the movements of Early on our flank. He has sent him back, and prevented a contemplated advance upon the Baltimore and Ohio Railroad.

WASHINGTON, November 12th .- A gentleman from the Shenandoah Valley to-day says that the larger part of Sheridan's army is in the neighbor Winchester, while the enemy is at Newmarket, receiving reinforcements. There have been no active military moves recently.

From the West. New York, November 12-We learn from Little Rock that Captain White, of Steel's army, on the 234, after a fight of four hours, captured an entire rebel train of thirty-five wagons and two hundred horses. This is probably one of the trains sent ahead of the main force by Price, with the intention of

From the Southwest.

NEW YORK, November 12 .- The Herald's New Orleans correspondent says our gunboats are watching the mouth of Red River for three very powerful rebel rams, which are expected to come down as soon as the water rises sufficiently. Jeff Davis' currency has been almost set aside by

the Texas rebels, and only gold and silver are being We have but little news from Mobile. Our gunboats have made experiments in shelling the city for

three hours every day.

From Rebeldom.

NEW YORK, November 12 .- The Commercial's Washington special says the rebel Commissioners have made a proposition to our Government, asking leave to purchase blankets in Northern cities for their prisoners, paying therefor in cotton. The question is under advisement. The Post's Washington special despatch says : The

Richmond papers of Thursday are greatly exercised over Lincoln's election. Hood is said to be marching on Chattanooga. The

rebels are confident that Grant is preparing for NEW YORK, November 12 .- The Richmond Senti-

nel, of Wednesday, says a large fleet of ironclads are in the James River, below Dutch Gap. It also says that the Union soldiers are not yet making any preparations for winter quarters, and that it is rumored that General Grant contemplates to move on Wilready sending troops to the latter place.

New York, November 12-Late Richmand papers contain the proceedings of the rebel Congress. The Judiciary Committee were directed to inquire into the expediency of requiring citizens liable to military duty, absent from the country, not on public business, to return and assist in the public defence, on pain of confiscation of their property and disfranchisement after the war, or any other adequate pen-

North Carolina papers say that Washington, in that State, has been evacuated by the rebel troops. From Atlanta.

CHATTANOOGA, November 11 .- An arrival from the front reports that on Monday, at daylight, the enemy attacked our pickets south of Atlanta, but subsequently fell back.

The election on Tuesday was quiet, and resulted largely in favor of Lincoln. On Wednesday morning the enemy made an attack on Atlanta, shells being thrown as far as Solling Mills. A most desperate attack was made on the south roads. The enemy's artillery was within 100 yards of our mortars. Our men were aroused from their slumbers, and quickly manned the defences, and soon drove the rebels off. There was no Federal loss. The enemy finally retreated towards Macon. Our army is in excellent spirits, and well supplied with rations.

Whereubouts of Sherman. WASHINGTON, November 11 .- This evening's Star says it deems it not improper at this time to state that Sherman's army has been heavily reinforced and otherwise strengthened in cavalry-all his dismounted men having been remounted. The force under Thomas, now in Hood's front, has also been reinforced and strengthened, and is amply sufficient to insure that Hood can do no damage to speak of in lifferent bodies in Hood's rear, and is already between him and any possible line for his retreat south, when he sees a necessity for so doing.

CINCINNATI, Nov. 12th-The Gazette's Nashville despatch denies the reported evacuation and burning of Atlanta and the destruction of the Chattanooga

Political.

NEW YORK, November 12 .- The World this morning acknowledges the defeat of Seymour, and says: "We have lost the State by both the electoral vote and the Governor's.

Miscellaneous.

NEW YORK, November 12 -A Washington despatch says that Gen. Banks will soon take charge of the Navy Department, and it is believed that the course to be adopted with reference to the infringement of Brazilian sovereignty in the capture of the Florida, will be substantially the transmission of a despatch, stating that this Government will be glad to receive and give favorable consideration to any proposition Brazil may have to make.

A letter to the Post mentions several instances of the former by Great Britain, and thinks no trouble can ensue in the Florida case.

Lord Lyons is lying very ill with typhoid fever. New York, November 12 -The appropriations of the last session of Congress exceed seven hundred are; but Lieutenant Cushing, cool and determined, and thirty-five million dollars, not including the interest of the public debt.

From Mexico.

New York, November 12th -The Herald's Matamoras letter of the 27th ult., says : " Cortinas, having become an Imperialist, has been sent on an expedition after his brother who is at the head of a band of guerrillas. The Juarezites are at Chihuahua with two thousand troops, and are said to be fortifying that place with the determination of standing a siege. At a recent public dinner, in Matamoras, one of Maximilian's officers gave as a toast, 'The union of the Southern Confederacy and Mexico," which was received with great applause, and the performance by the band of the 'Bonnie Blue Flag.'"

New York, November 12 -A letter from Matamoras says that when Mejia was known to be advan-cing on that city, within's a day's march, most of the foreigners claimed the protection of their respective Consuls. Mr. Beldin, formerly a merchant of Brownsville, claiming to be the rebel Consul, was recognized by Cortinas, and was permitted to deliver certificates of rebel nationality. Monterey is now occupied by a brigade of French, under Gen. Decasing. He recently sent Gen Vidaurri with an escort, to the City of Mexico, for the purpose of taking the oath of allegiance to the Emperor Maximilian. The Union and Confederate forces on the Bic Grande are neither attempting to molest each other. It is reported that three pieces of artiflery had arrived at Brownsville, and more were expected, which the Confederates await to make an attack on the Federal garrison at Brazos. The forces on either side are very smuil.

From Australia. Excitement about Independence.

By the arrival of the ship Fray Bentos, we have dates from Sydney to the 17th of August-a month later than previous advices. There have been serious floods; Maitland suffered

especially. Great Britain has refused to stop the transportation of convicts to Australia. The Sydney Mail says the refusal is likely to create an irritable feeling between the mother country and the Colonies.

Numerous highway robberies are reported. The Mail says, " Robbery with arms has not yet ceased to be characteristic of New South Wales. The wool of the alpacas introduced into Australia sells for only 4 pence (8 cents) a pound in England;

but it is thought the wool will improve. In the Colony of Victoria great excitement prevails about the transportation. In the Colony of Queensland, the Legislature

adopted a resolution thanking Dr. Lang for his longcontinued advocacy of Australian independence. It is expected that a grant of land will be given to him. A New Movement on Japan,

NEW YORK, Nov. 8-The following are the details of the news by the City of Baltimore : Hongkong advices of September 10th say that a

fleet of British ships, mounting 184 guns, three French ships and five Dutch ships, were nearly ready to leave for Japan. A merchant steamer has been chartered by the American Minister to carry the United States flag in the action, in order to be represented. The object is

to force the opening of the Inland Sea according to the treaty. New York, Nov. 10 .- The World's Japan letter says : " The expedition for the inland seas of Japan sailed to attack that place about the 10th of September. Eight English, three French, five Dutch, and one American vessels, comprised the fleet."

Miscellaneous Items.

FORTY MILES AN HOUR AT SEA .- The Liverpool Mercury observes that Mr. James Steel, a working joiner of that town, has invented a screw propeller, and that he states from experience made on the Prince's Park Lake, that with this screw he can get four times the speed of the ordinary screw with the same engine and the same pressure of steam. The screws are worked reverse by means of two wheels at the centre boxes of the screws, and can be replaced at sea at any time, and being only one-third in the water, can be unshipped without any difficulty. There are six blades in one frame, the reversible one catching the back water as the ordinary one, giving thereby five times the velocity, as proved the last three to four years on Prince's Park Lake. The steam on his model is raised by Naptha. The Admiralty has been communicated with, and the Duke of Somerset has ordered the tracings to be sent, which was done on the 1st instant.

How to HAVE PEACE .- General Sherman, the hero of Atlanta, is among the best peace men in the country, and he knows the only way we can secure peace.

Hear what he said to the people of Atlanta : "We must have peace, not only at Atlanta, but in all America. To secure this we must stop the war that now desolates our once happy and favored country. To stop war we must defeat the rebel armies that are arrayed against the laws and Constitution . which all must respect and obey. To defeat these For LAHAINA, armies we must prepare the way to reach them in their recesses, provided with the arms and instruments which enable us to accomplish our purpose. * * * I know I had no hand in making this war, and I know I will make more sacrifices to-day than any of you to secure peace. But you cannot have peace and a division of our country. If the United States submits to a division now, it will not stop, but will go on until we reap the fate of Mexico, which is eternal war. The United States does and must assert its authority wherever it has power; if it relaxes one bit to pressure, it is gone, and I know that such is not the National feeling. * * * The only way the people of Atlanta can hope once more to live in peace and quiet at home is to stop this war, which can alone be done by admitting that it began in error and is perpetuated in pride. We don't want your negroes or your horses, or your houses or your land, or anything you have; but we do want and will have a just obedience to the laws of the United States. ... That we will have, and if it involves the destruction of your improvements, we cannot help it. You have heretofore read public sentiment in your newspapers, that live by falsehood and excitement, and the quicker you look for truth in other quarters the better for

Retaliation is a harsh school, but savages will learn in no other. Quantrell never sacked a second Lawrence. Forcest never repeated his Fort Pillow experiment. Recently the rebels sent a Union family into our lines at Vicksburg as traitors to the Confederate cause, and confiscated their property; whereupon, General Dana sent a rebel family into the rebel lines, confiscated their house and gave the use thereof to the exiled Union family. The rebels at Charleston placed some Union officers, prisoners in their hands, under fire of our guns; the Union General recipro-cated in kind; and a week or two after the rebels cried peccavi, removed the prisoners to a place of personal safety, and so notified the commander of the Government forces, who again followed their example. While digging the canal at Dutch Gap, on James river, lately, a rebel battery opened on the workmen; a Union battery replied; the rebels placed Union prisoners around their guns, exposed to our fire; General Butler followed suit and placed captured rebels among the laborers on the canal, when the rebels again cried "enough" and remanded the prisoners to other quarters. The rebel papers talk much about "civilized warfare," but the conduct of rebel leaders shows that they are reckless or ignorant of its simplest requirements, and thus only can they be Tennessee or Kentucky, which seems to be his aim. | taught the ABC's of civilization and humanity. By Sherman is operating with his other five corps in and by they will realize that there is not a single

BRILLIANT ACHIEVEMENT .- NEW YORK, Nov. 3 -A Hampton Heads correspondent gives the following account of the destruction of the rebel ram Albemarle: " Along the dock where the Albemarle was moored were a large number of soldiers, evidently stationed there to guard against surprise by the landing of a force in front of their lines. The blaze of a number of campfires lighted up the rebel vessel and the river. By the aid of these, Lieutenant Cushing discovered a piece of the floating timbers which surround the ram on accessible sides, to guard against the approach of rams and torpedoes, and by the aid of the same light he plainly saw a large body of soldiers thronging to the wharf and blazing away at his boat. To quiet these fellows he brought the bow of his boat around a little and discharged a heavy load of canister into them from his twelve pound howitzer mounted at the bow. Making a complete circle under a sco-ching musketry fire, at less than thirty yards, he came around bow on, at a full head pressing them in toward the hull of the ram. The boat soon lost headway and came to a stand-still, refusing to back off or move ahead. The moment for decisive action had arrived. By the fire of muskets and pistols almost in his face from the ports of the ram and from a hundred small arms on shore, several of his men were wounded. The case looked desper-

seized the lanyard to the torpedo and a line of spars,

and crowding the spars until he brought the torpedo

under the overhang of the Albemarie, he detached it. He then pulled the lanyard of the torpedo and exploded it directly under the vessel, on the port side, just below the port hole of the 200-pounder Brooks' rifle gun, which at the same moment was discharged at the boat. An immense volume of water was thrown up by the explosion of the torpedo, almost drowning the boat. To add to the peril of the moment, a heavy shell from the enemy's gun had gone crushing through the bottom of the boat, knockng the splinters about in terrible style. She at once began to sink. Cushing ordered all hands to save themselves as best they could. He divested himself of his coat and shoes and jumped into the river, followed by those of the men who were able to do so. All struck for the middle of the river, under a hot fire of musketry, the balls striking all about themin two or three instances, it is feared, so badly wounding the swimmers that they sunk before the boats from the shore could reach them. Cushing heard the rebels take boats and push after the survivors, demanding their surrender. Many gave up. I'wo of his seamen were drowned near by him, whether owing to wounds received or exhaustion he could not state. How many fell into rebel bands is not ascertained. Cushing swam down the river for half a mile, until exhauste i, but reached the shore about daylight, and crawled through the swamp until he reached a position within speaking distance of the enemy's fort. While lying there, rebel officers walked by. From their conversation, he learned that the rum was destroyed. After a while, deeming the situation unsafe, he managed to push himself along until he got a better position Before midnight he secured the services of a negro to go back and look after the Albemarle. The negro returned and reported her sunk. Cushing then struck through the swamps in his stocking feet until he reached a point six miles below the town, when he took a boat with a paddle and put off for the squadron, twelve miles distant, reaching it in safety. Cushing's report says the distance from the mouth of the river to the ram was eight miles. In his march he succeeded in passing the rebel pickets stationed along the river, and was not hailed except by the lookouts on the

ram. European.

CAPE RACE, November 12 .- The steamer Nova Scotian, from Liverpool the 3d, and Londonderry.

the 4th, has arrived. It was thought that the steamer Laurel, from Liverpool, had transferred her crew and ammunition to the steamer New Alabama, off Modena. The London Herald strongly denounces the cap-

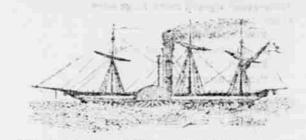

ture of the Florida in indignant terms, The Times says the capture of the Florida in the harbor of a friendly State is simply an act of piracy. The Herald says that if the Washington Govern-

ment does not release the Florida, all the maritime powers have a right to interfere in the matter. New York, November 5 .- The Commercial's Paris letter says the late treaty with Italy continues to occupy a large share of public attention. It is not certainly known what conduct the Rome Government will adopt, or whether the Pope will create an army of defence or not. It is said when the French Ambassadors carried to the Pope the official announcement of the treaty, his Holiness pointed to the crucifix, and in silence. Afterwards he made expression of his great disappointment. The speedy meeting of the Italian Parliament will clear away the coints now obscure. A strong effort will be made to

carry the Capital to Naples. The French mail steamer Louisiana carried out the first instalment of Maximilian's European army, consisting of six hundred Belgians. The enrolments for this army consist of eight thousand Frenchmen, six thousand Austrians and two thousand Belgians, made by volunteering. Thus far the offers of service are much slower than anticipated.

THE STEAMER

'KILAUEA!'

Will leave Honolulu On MONDAY, - - December 12,

AT HALF-PAST FOUR O'CLOCK, ULUPALAKUA. MAALAEA BAY, KALEPOLEPO. KEALAKEAKUA.
